Louise Drescher
drescher@telus.net

Dear Ms. Drescher:

Thank you for forwarding the petition and signatures regarding Rossland's water supply and the proposed golf course development at Red Mountain Resort.

The questions you raise about cost of redeveloping the current water system, the impacts on the existing sewage system and the impacts on water supply and quality will definitely be considered as part of the review of the Red Mountain proposal. Ministry of Tourism, Sport and the Arts expect to receive the complete development proposal in the next months, and will initiate an inter-agency review once we have accepted the application. The review will also include opportunities for public comment, further to the initial summary information that was provided at the first meeting.

I encourage your continued involvement in this process. The most effective way to communicate your concerns is to ask specific questions and to provide specific information. MTSA land-use decisions are based on environmental, social and economic principles. Your input in this regard is appreciated.

Yours truly

Psyche Brown
Manager, Major Projects
